

NORTHSTAR REGIONAL MEDICAL CENTER

ADMINISTRATIVE RECORD | Generated 17 Sep 2026 08:42

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Patient Registration and Demographic Record

Chief reason for visit: Fever, productive cough, shortness of breath and generalized weakness for approximately three days.

Insurance / administrative note: Synthetic test patient. This record is fictional and created solely for software evaluation.

Field	Recorded value	Source status	Confidence
Patient name	Marcus D. Whitfield	Registration	High
Date of birth	12 Apr 1968	Registration	High
Address	1187 Cedar View Drive, Northridge	Registration	High
Emergency contact	Elena Whitfield, spouse	Registration	High
Primary language	English	Registration	High

NORTHSTAR REGIONAL MEDICAL CENTER

CLINICAL NOTE | 17 Sep 2026 09:18

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Emergency Department Physician Note

History of present illness: 58-year-old man with type 2 diabetes mellitus, hypertension and hyperlipidemia presents with fever to 102°F at home, productive cough with yellow sputum, dyspnea/SOB and fatigue.

Initial assessment: Possible community-acquired pneumonia. Sepsis considered; blood cultures and lactate ordered. Patient reports no chest pain.

Past history: HTN/high blood pressure, T2DM/type II diabetes, hyperlipidemia. Remote appendectomy.

Allergies: No known drug allergies (NKDA) per triage interview.

Vital	09:05	09:40	Reference
Temperature	38.8 °C	38.4 °C	36.0–37.5 °C
Heart rate	112 bpm	106 bpm	60–100 bpm
Respiratory rate	24/min	22/min	12–20/min
Blood pressure	146/88 mmHg	138/82 mmHg	<140/90
SpO ₂	91% room air	94% on 2 L NC	≥94%

NORTHSTAR REGIONAL MEDICAL CENTER

LABORATORY REPORT | Specimens collected 17 Sep 2026 09:30

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Emergency Department Laboratory Report

Laboratory accession: LAB-ED-260917-A. Values flagged H/L are outside the stated reference range.

Test	Result	Unit	Reference
WBC	15.8 H	10 ⁹ /L	4.0–11.0
Hemoglobin	13.9	g/dL	13.5–17.5
Platelets	286	10 ⁹ /L	150–450
Sodium	133 L	mmol/L	135–145
Potassium	5.8 H	mmol/L	3.5–5.1
Creatinine	1.1	mg/dL	0.7–1.3
Glucose	246 H	mg/dL	70–140
Lactate	2.4 H	mmol/L	0.5–2.2

Laboratory comment: Potassium specimen demonstrates moderate hemolysis. Repeat measurement recommended before treatment decisions.

NORTHSTAR REGIONAL MEDICAL CENTER

LABORATORY REPORT | 17 Sep 2026 10:22

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Repeat Chemistry Panel

Repeat specimen accession LAB-ED-260917-B obtained due to hemolysis warning on prior sample.

Test	Prior result	Repeat result	Interpretation
Potassium	5.8 mmol/L	4.4 mmol/L	Repeat accepted; initial likely hemolyzed
Sodium	133 mmol/L	134 mmol/L	Mildly low
Creatinine	1.1 mg/dL	1.0 mg/dL	Stable
Glucose	246 mg/dL	221 mg/dL	Elevated

Result note: For this encounter, repeat potassium 4.4 mmol/L is the clinically accepted value.

NORTHSTAR REGIONAL MEDICAL CENTER

RADIOLOGY REPORT | 17 Sep 2026 11:05

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Chest Radiograph Report

Exam: Chest X-ray, two views.

Findings: Patchy right lower lobe air-space opacity with mild bibasilar linear atelectatic change. No pleural effusion or pneumothorax. Cardiomedial silhouette within normal limits.

Impression: Right lower lobe infiltrate concerning for pneumonia. Correlate clinically.

Reporting radiologist: Dr. Nina Alvarez, MD

NORTHSTAR REGIONAL MEDICAL CENTER

ADMISSION NOTE | 17 Sep 2026 12:10

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

History and Physical — Admission

Admitting diagnosis: Community-acquired pneumonia with hypoxemia. Rule out sepsis.

Plan: Admit to medical floor. Ceftriaxone plus azithromycin initiated. Supplemental oxygen. IV fluids. Glucose monitoring and insulin correction scale.

Medication history from patient: Lisinopril 20 mg daily, metformin 1000 mg twice daily, atorvastatin 40 mg nightly.

Conflict intentionally present for testing: This note records DOB as **13 Apr 1968**, while registration and subsequent verified records state 12 Apr 1968. Treat this note's DOB as a documentation discrepancy.

Allergy: Patient again initially denies medication allergy.

NORTHSTAR REGIONAL MEDICAL CENTER

NURSING NOTE | 17 Sep 2026 13:00

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Nursing Admission Assessment

Patient transferred from emergency department. Alert and oriented x4. Ambulates independently with mild exertional dyspnea. Oxygen 2 L/min via nasal cannula.

Skin intact. Peripheral IV in left forearm. Productive cough continues. Fall risk low.

Medication reconciliation observation: Patient states he was previously told he developed a rash after penicillin as a child but is unsure whether this represents a formal allergy.

Escalated for pharmacist/physician allergy reconciliation.

Time	Temp	HR	BP	SpO2	O2
13:00	38.1 °C	102	134/80	95%	2 L NC
16:00	37.7 °C	94	128/76	96%	2 L NC
20:00	37.4 °C	88	122/72	95%	1 L NC

CONSULTATION NOTE | 17 Sep 2026 15:15

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Clinical Pharmacy Consultation

Medication/allergy reconciliation: Patient reports prior **penicillin-associated maculopapular rash** in childhood. No history of anaphylaxis, airway compromise, or severe cutaneous adverse reaction.

Allergy list updated: **Penicillin — rash — moderate confidence historical reaction.**

Ceftriaxone may be continued with routine clinical monitoring given non-severe historical reaction and no current reaction.

Terminology variants noted: hypertension/HTN/high blood pressure; type 2 diabetes/T2DM/type II diabetes; shortness of breath/SOB/dyspnea.

NORTHSTAR REGIONAL MEDICAL CENTER

PROGRESS NOTE | 18 Sep 2026 08:10

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Hospital Progress Note — Day 1

Overnight fever resolved. Cough persists but dyspnea improved. Oxygen requirement reduced to 1 L NC.

Assessment: Community-acquired pneumonia, improving. Sepsis workup negative to date; sepsis less likely.

Medication update: Blood pressure 98/62 overnight after fluid shifts. Hold lisinopril today due to hypotension.

Diabetes: Continue glucose monitoring; metformin remains temporarily held.

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Respiratory Therapy Note

Patient evaluated for oxygen weaning. Resting SpO₂ 96% on room air for 20 minutes; ambulation SpO₂ 94–95%. No accessory muscle use.

Dyspnea significantly improved. Incentive spirometry reviewed.

NORTHSTAR REGIONAL MEDICAL CENTER

CONSULTATION NOTE | 18 Sep 2026 13:30

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Infectious Disease Consultation

Impression: Community-acquired pneumonia involving right lower lobe. No bacteremia. No evidence supporting ongoing sepsis.

Recommendation: Transition to oral antibiotic when clinically stable. Total treatment duration five days if continued improvement.

Allergy history reviewed. Penicillin rash documented; no immediate hypersensitivity.

NORTHSTAR REGIONAL MEDICAL CENTER

PROGRESS NOTE | 19 Sep 2026 08:40

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Hospital Progress Note — Day 2

Afebrile for >24 hours. Breathing comfortably on room air. Appetite improved.

Assessment: CAP improving. Sepsis ruled out.

Medication reconciliation: Lisinopril remains discontinued/held because blood pressure has been low-normal. Reassess with primary care after discharge.

NORTHSTAR REGIONAL MEDICAL CENTER

PROCEDURE NOTE | 19 Sep 2026 11:15

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Procedure Documentation

Procedure: Peripheral IV removal and discharge readiness assessment.

Left forearm IV removed intact. No complication. Patient educated regarding medications, warning signs, and follow-up.

This minor procedure is included to provide procedure extraction and coding test material.

NORTHSTAR REGIONAL MEDICAL CENTER

NURSING NOTE | 19 Sep 2026 15:10

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Nursing Progress and Discharge Preparation

Patient independently ambulatory. No respiratory distress. Demonstrates understanding of medication instructions.

Blood glucose before dinner 162 mg/dL. No symptomatic hypoglycemia.

Education: complete prescribed antibiotic course; seek urgent care for worsening dyspnea, persistent fever, chest pain, confusion, or inability to maintain oral intake.

NORTHSTAR REGIONAL MEDICAL CENTER

DISCHARGE SUMMARY | Discharge 20 Sep 2026

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Physician Discharge Summary

Final diagnoses: 1) Community-acquired pneumonia, right lower lobe, improving. 2) Hypoxemia, resolved. 3) Type 2 diabetes mellitus with hyperglycemia. 4) Hypertension. 5) Hyperlipidemia. 6) Penicillin allergy — rash, historical. **Sepsis ruled out.**

Hospital course: Treated with ceftriaxone and azithromycin, oxygen and supportive care. Repeat potassium normal after hemolyzed initial sample. Blood cultures negative.

Disposition: Home, stable.

NORTHSTAR REGIONAL MEDICAL CENTER

MEDICATION RECORD | 20 Sep 2026

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Discharge Medication Reconciliation

Medication	Discharge instruction	Status	Notes
Azithromycin	500 mg PO daily × 2 days	Active	Complete course
Lisinopril	10 mg PO daily	Discontinued / DO NOT TAKE	Earlier 20 mg list superseded
Metformin	1000 mg PO BID	Resume	When eating normally
Atorvastatin	40 mg PO nightly	Continue	Active

Intentional conflict for testing: Earlier documents listed lisinopril 20 mg active; this discharge reconciliation supersedes that status and instructs that it is currently not to be taken.

NORTHSTAR REGIONAL MEDICAL CENTER

ADMINISTRATIVE / FOLLOW-UP RECORD | 20 Sep 2026

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Post-Discharge Follow-Up Plan

Primary care follow-up within 5–7 days for blood pressure review and medication reconciliation.

Repeat chest imaging only if symptoms fail to resolve or as clinically indicated.

Review home blood pressure readings before restarting antihypertensive therapy.

Allergy history may be considered for formal outpatient penicillin allergy evaluation.

NORTHSTAR REGIONAL MEDICAL CENTER

CLINICAL NOTE | 26 Sep 2026

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Primary Care Follow-Up Note

Patient reports cough nearly resolved, no fever, no dyspnea. Completed antibiotic course.

Blood pressure 132/78 mmHg. Primary care clinician restarts **lisinopril 10 mg daily** with monitoring.

Assessment: pneumonia clinically resolved; hypertension stable; T2DM continues.

PROGRESS NOTE | 06 Oct 2026 16:20

Patient	Marcus D. Whitfield	MRN	SYN-2026-004821
DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Physician Addendum

Review of entire hospitalization confirms: pneumonia resolved after treatment; sepsis ruled out; initial elevated potassium was associated with hemolysis and repeat potassium was normal.

Medication chronology: lisinopril 20 mg before admission → held during hypotension → discharge instruction to not take temporarily → restarted by PCP at 10 mg daily.

Identity chronology: one admission note contained incorrect DOB of 13 Apr 1968; verified demographic record is 12 Apr 1968.

DOB	12 Apr 1968	Sex	Male
Encounter	ENC-2026-0917	Facility	Northstar Regional Medical Center

Longitudinal Clinical Summary

Marcus D. Whitfield experienced an acute hospitalization beginning 17 Sep 2026 for fever, productive cough and shortness of breath. Imaging supported right lower lobe pneumonia. He improved with antimicrobial therapy and supportive care.

The longitudinal record contains intentionally repeated and conflicting facts. The clinically reconciled state is: DOB 12 Apr 1968; penicillin allergy manifested as historical rash; sepsis ruled out; repeat potassium 4.4 mmol/L supersedes hemolyzed 5.8 mmol/L sample; lisinopril active again at 10 mg daily after outpatient follow-up.

All content in this document is synthetic and generated for pipeline testing.
